

Mythos Series

Mythos Series models are slim, elegant speakers with aluminum enclosures designed to match the styling of today's high tech flat panel TVs. Mythos loudspeakers are available in space-saving on-wall, shelf-mount and floor-standing configurations, for the ultimate in placement flexibility and ease. Their high tech enclosures, drivers, and narrow shape produce huge, box-less imaging normally found only in ultra-high end speakers. Combine Mythos main, center and surround models with Definitive powered subwoofers, for superior performance home theater systems that look as good as they sound.

The Mythos XTR series speakers are the ideal high-performance speakers to use with ultra-thin TVs.

Mythos SuperTower Series

Mythos SuperTowers® combine stunning cosmetics and precision fit & finish with jaw-dropping, ultra-high end performance. No loudspeaker has achieved their balance of beauty and brawn anywhere near their modest price. Mythos SuperTowers' magic start with a sleek aluminum cabinet mounted on a beautiful polished granite base, and continues with our most advanced components and technologies. Topping off the ground-breaking design is the incorporation of 300 Watt SuperCube™ powered subwoofers. You'll enjoy double the bass while saving floor space, and enhancing the beauty of your room. Choose between the original award-winning Mythos ST and the smaller Mythos STS for sonic performance truly in a class by itself.

Mythos STS and ST SuperTowers

SoloCinema XTR

High Performance... Simplified: The SoloCinema XTR® is the newest of our industry-leading line of high performance loudspeakers. It is the only active surround bar on the market that complements ultra-slim TVs and delivers on every attribute desired by today's home theater enthusiast: sleek appearance, premium fit and finish, high quality materials, effortless installation and superior, lossless High Definition audio from BluRay players and other HD sources. This two-piece system consists of a slim surround bar and easily concealed, wireless subwoofer delivers component-level home theater performance, with incredibly enveloping HD surround sound, without a complicated set-up, or running wires for rear speakers.

SoloCinema XTR System

Mythos SSA Single Enclosure Surround Speakers

"The Perfect Solution When Rear Speakers are Not an Option"

For those who choose not to use rear channel speakers, but want the thrills of five-channel surround sound, Definitive Technology offers the perfect solution: the Solo Surround Array Series loudspeakers. The SSA models incorporate Spatial Array, a unique patented technology that optimizes the spatial presentation of five channels to create the illusion that you are surrounded by five separate high performance speakers. Enjoying a superb sounding, audiophile-grade surround experience has never been more convenient. Simply connect an SSA to any multi-channel receiver and powered subwoofer to enjoy enveloping surround sound without the bother of running long wires and finding places for rear speakers.

Bipolar technology creates a huge, three-dimensional soundstage for every listener in the room.

Bipolar SuperTower Series

The BP SuperTowers feature bipolar technology. Each speaker incorporates two sets of drivers—one facing forward, the other facing the rear—radiating clear, vibrant, lifelike sound, much like music is produced in real life. The result is a huge, three-dimensional soundstage for every listener in the room. Bipolar SuperTowers feature built-in powered subwoofers for lightning-fast, earthshaking bass without the need for separate subwoofer cabinets! Combine them with our perfectly matched CS Series centers and SR Series surrounds, for an extraordinary home theater system "consistently thrilling, involving, and best of all, flat out fun".

[Home Theater magazine]

BP SuperTower Series (L to R) BP-8080ST, BP-8060ST, BP-8040ST and BP-8020ST

CS Center Channel Series

CS models are the matching center channels for Bipolar Series floor-standing and StudioMonitor bookshelf speakers. They are designed to the same rigid standards and high-performance goals as our main left and right front speakers. CS models feature wide frequency response and extended dynamic range, with extraordinary detail and articulation. Two of the three CS models feature built-in powered subwoofers for stunningly powerful performance.

CS-8080HD Center Channel

SR Surround Series

These bipolar radiating surround speakers offer a broad dispersion pattern that makes them the perfect rear and side channel complements for BP and BP SuperTower front channel models.

Bipolar Surround

The BP SuperTowers' advanced patented technologies, robust materials and solid construction deliver lifelike sound quality and total listening enjoyment.

StudioMonitor Series

The SM Series bookshelf models perfectly fit applications that demand compact speakers with big speaker sound. These full-range speakers feature extended low-frequency characteristics, delivering superb performance either as stand-alone speakers, or when paired with separate subwoofers. *Soundstage HiFi* called the SM55 "a floorstanding speaker masquerading as a bookshelf speaker."

StudioMonitor 45, 55 and 65

ProCinema/ProMonitor Series

ProCinema/ProMonitor speakers satisfy the need for small, easy-to-place speakers that deliver true state-of-the-art performance. ProMonitor satellites are small enough to fit in the palm of your hand, and may be wall-mounted, shelf-mounted, or used on floorstands, making them easy to integrate into any décor. ProCinema 600 and 800 systems are pre-packaged home theater speaker systems with front, surround, center, and subwoofer speakers in one convenient carton. ProMonitor and ProCenter are individually packaged satellite and center speakers that may be mixed and matched with ProSub subwoofers to custom build music and movie systems of astonishing performance capability: The sonic depth, width, and height reproduction of these amazingly compact speakers is so big that *Home Theater* magazine said they "seem as though they are monster towers if you close your eyes."

ProCinema 600 System

ProSub Series

The compact ProSub series was originally designed to complement the ProMonitor/ProCinema Series. But their winning combination of high output, deep and lightning-fast response make them a perfect choice for any audio system. Relentlessly value engineered to bring you top performance at modest prices, the ProSub series is a run-away success story.

ProSub 800 and 1000

SuperCube Series

Our best powered subwoofers are, dollar for dollar, the finest powered subwoofers on the market. SuperCube subwoofers are astoundingly compact. The best-selling SuperCube 2000 is barely larger than a toaster, at just .6 cubic foot. Yet the SuperCube's subterranean bass depth, seismic power and instantaneous quickness bring a level of realism comparable to far larger and costlier subwoofers. Professional installers specify SuperCube subwoofers for the finest systems and most demanding applications and listeners. Several SuperCube models can be used with an optional wireless connectivity kit, for the ultimate in convenience.

SuperCube 6000

All-Weather Series

Enjoy Definitive Technology's incomparable sound all around your home with the ground-breaking All-Weather Series. With their fully sealed design, racetrack bass radiators, and rugged PolyStone enclosures, the AW's can be exposed to the elements and still reliably deliver great sound quality for years of outdoor listening enjoyment. Their high technology components and unique design deliver clear mids, extended highs, and thunderous bass even in difficult outdoor conditions. You can have great Definitive sound on the patio, deck, garden, or sauna.

Ultimate In-Wall (UIW) Series

Do you want the sound quality of big-box speakers, but don't want to use any floor space? Flush-mount UIW Series speakers are the perfect solution. Choose from in-ceiling, in-wall and Bipolar surround speakers, and even an in-wall subwoofer. These premium-quality speakers deliver superb sound for high end home or commercial applications: anywhere you want warm, rich, sonic performance without a cabinet-style speaker.

Disappearing In-Wall Series

Extraordinary high-performance speakers that virtually disappear in your room, Disappearing™ In-Wall series feature near-invisibility thanks to their small diameters, hidden flange design, and low profile micro-perf grilles. They look practically invisible, yet install as easily as traditional wide flange flush-mount speakers. Definitive's latest exclusive technologies deliver performance one would expect from expensive free-standing speakers. DI Series models cover every need, including a single speaker stereo unit, round in-ceiling, square and rectangular in-wall and a bipolar surround.

UIW Reference Built-in Series

The Reference series of built-in speakers utilize our best technologies and integrated enclosures to deliver the best possible sound for ultra-stealth, built-in home theater systems. In-wall, in-ceiling, bipolar and in-wall subwoofer speakers can help you create your dream home theater system.

Definitive Technology: Where Precision Sound Meets Iconic Design™
